DETAILED ACTION

1. Claims 1,22-40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johansson et al (5,277,764, Andersson et al (5,607,552) or Keiser et al (6,486,216).

The claims are rejected for the reasons given in the previous Office Action, mailed 7/29/2003.

2. It is urged that the viscosity cannot be inferred from the properties of the silica particles of the prior art. This not found persuasive for the reasons given in the previous Office Action. The comparison made in the present specification does not appear to correspond to the above cited prior art and hence do not support any unexpected results or properties over the prior art.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
